

*Goot Essa began in 2001* with a group of Amish dairy farmers who worked together to produce high quality cheese with some of their milk. Our goal is to keep our families on the farm.

We have chosen to work our fields in the traditional way. Our farms are small, but each acre and animal is cared for with love and respect for the ways of nature. Ours are true family farms where each member of the family has chores and contributes to the good of the farm and the whole community.

Our goal is to offer products made from the freshest, highest quality, all natural ingredients. We want you to experience food straight from the farm. We offer foods with real flavor, made by hand in small quantities, with individual attention that makes a purchase for your table or a gift for a friend so much more meaningful.
